Road Safety Programm **corporate social responsibility**
heritage **environment sponsors courses & symposiums**
investigation **publications sustainability castellet castle**

1 abertis foundation

- The **abertis foundation** promotes research into the repercussions of major infrastructures on territory, in particular on the environment, the economy and demographics.
- As one of the responses to the commitment to Corporate Social Responsibility by **abertis**, the foundation also runs a broad Road Safety Programme, the aim of which is to raise public awareness of the need for responsible mobility.
- The foundation also channels the actions of the companies in the abertis group in the area of corporate responsibility, and over time has become a factor of cohesion between the different business units.

MAIN ACTIVITIES

Investigation:

The **abertis foundation** has promoted the following studies for TBI:

- Study anti- & de-icing: The main aim of the study is to find out which products ensure perfect adherence for aircraft during landing, so stopping them from skidding on the runway surface with the consequent implications for passenger safety. These products must also be environment-friendly.
- Mobility at Luton airport: development of a public transport system for employees at Luton Airport . The goal was to reduce CO2 emissions by lowering road traffic, because almost 35% of mobility by road at the airport is caused by the nigh on 8000 people working there.
- University of Bedfordshire & London Luton Airport Scholarships and Bursaries for undergraduate students in the Business School under a twelve-week placement in London Luton Airport .

2 abertis foundation

MAIN ACTIVITIES

Road Safety Programme

This is the best proof of the leading role played by our organisation in improving safety for drivers and pedestrians, and in risk prevention and cutting accident rates.
